Montgomery, Alabama

# FRONTLINE NEWS:

## Why do we do what we do?

Abortions are increasing in our state due to the growing availability of chemical abortion pills being mailed directly to Alabama women. We bring our mobile clinic to neighborhoods where women live, shop, and work, using the power of ultrasound to serve women, save babies, and share Jesus BEFORE a life-ending decision is made. Abortion pills are FLOODING into our state. **Abortion thrives in secret and silence: we must speak up and rescue those with no voice.**

**70%**  
of abortions  
in the U.S. are  
done with  
abortion pills.

### GREAT NEWS!

**Abortion Pill Reversal (APR) is now being offered on our mobile units!**

When a woman has taken the first abortion pill, if she sees a physician soon enough, her baby can be saved. These pills are very easy to obtain online and are even being mailed into Alabama from other states. New challenges require new strategies. We are grateful to have a medical director, Dr. Matthew Phillips, who helps women reverse the effects of the abortion pill, and a supportive Board that allows us to serve additional days for women who need these services.

What can YOU do? PRAY, GIVE, and GO!
